Location: Bengaluru, Karnataka, India

Professional Summary

Results-driven Backend Software Engineer with 3 years 8 months of experience designing and building scalable distributed systems. Proficient in Python, Go, and Java, with extensive hands-on expertise in AWS, Kubernetes, and Docker. Proven track record of optimizing database performance, implementing event-driven architectures using Kafka, and delivering robust REST APIs. Passionate about system design, microservices, and solving complex backend engineering challenges.

Work Experience

Razorpay Technologies Pvt Ltd

Backend Software Engineer | Jan 2023 - Present

- Spearheaded the backend architecture for a high-throughput payment reconciliation microservice using Go and gRPC.
- Optimized legacy PostgreSQL database queries, reducing average query execution time by 40%.
- Introduced Redis read-through caching to decrease latency for the primary checkout API by 150ms.
- Containerized existing monolithic applications using Docker and orchestrated deployments on AWS EKS (Kubernetes).
- Mentored two junior developers and conducted code reviews focusing on performance and security.

Swiggy

Software Engineer | Aug 2020 - Dec 2022

- Developed scalable microservices in Java (Spring Boot) and Python (FastAPI) for the logistics assignment team.
- Integrated Apache Kafka to handle asynchronous event processing for real-time delivery tracking, processing 10k+ events/sec.
- Built and documented 15+ secure REST APIs for internal operations dashboards.
- Collaborated with cross-functional teams to improve order assignment algorithm efficiency by 12%.

Technical Skills

Languages: Python, Go, Java

Frameworks & Libraries: FastAPI, Spring Boot, Flask

Databases & Caching: PostgreSQL, MySQL, Redis, MongoDB

Cloud & DevOps: AWS (EC2, S3, RDS, EKS), Docker, Kubernetes, CI/CD, Terraform

Architecture & Messaging: Microservices, System Design, REST APIs, Apache Kafka, gRPC

Education

Rahul Sharma

Backend Software Engineer | Distributed Systems & Cloud Infrastructure

National Institute of Technology (NIT), Trichy

Bachelor of Technology in Computer Science | 2016 - 2020

Certifications & Projects

- AWS Certified Solutions Architect - Associate
- Certified Kubernetes Administrator (CKA)
- Distributed Key-Value Store: Built a fault-tolerant distributed key-value store using the Raft consensus algorithm in Go.
